

Prefer to not use flash?

Use our alternate (non-flash) upload solution by doing the following:

- Find the "Manage your Directory Tree" section
- Click on the "Tree Root" folder
- Click on the "File" menu item in the bar above that
- Hit the "Add" button in the submenu
- Select a file from your computer
- Repeat the last two steps for additional files
- Press the "Upload" button next to the "Add" button

Unfortunately we do not have upload progress feedback while files transfer during this (non-flash) method.
